

# Dentals waxes for laboratory

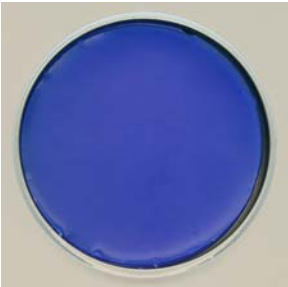

**Cervical wax** tension free for precise margins of the crowns and inlays. Easy to work with a warm spatula. Thanks to its good qualities it can come off the crown without it breaks or deform.

Easy to carve without broken, Crumbling or laminated.  
Opaque red color for the easy perception of the margin line.  
Stable in form and exact fitting.  
A soft, tension free and elastic wax.

Ref. 25155051  
Tin 50g  
Uniform wax  
Color: red  
P.f. 61°C.  
CE: NO

**Milling wax** A very hard wax. Ideal for works with turning machine and heated instruments for the preparation of interior cones. At the end of one milled a plain surface is always obtained, without filings.

Resistant to the break and tears.  
Easy to work with the warm spatula.  
Uniform wax.  
Easy to carve without breaking or crumbling.  
Burns without traces.  
Dark blue colour that allows an easy perception of the outline model.

Ref. 25205051  
Tin 50g  
Color: dark blue  
Good detachment  
Quick solidification  
Smooth surfaces  
Low contraction  
P.f. 115 °C.  
CE: NO

**White wax in tin** Ideal for study models and orthodontia Works.

Color similar to the teeth.  
Uniform, It doesn't present granules or hard parts.  
Low contraction.  
Stable in form and exact fitting.  
Smooth – flowing wax in liquid for easy work.

Ref. 25255051  
Tin 50g  
Color; white  
Smooth surfaces  
Easy to work  
Cools down quickly  
P.f. 61°C  
CE: NO

**Utility wax** wax of general use, ideal to fill small imperfections or apply sprues to sprue bases, since utility wax adheres to almost all surfaces and its high melting point allows to work on it with modelling wax

Wax with plastic qualities at room temperature.  
Adhesive qualities. Build-up by rubbing over surfaces.  
Soft and flexible wax.  
High melting point.

REF.24001051  
Weight: 450g  
Number plates: 6  
Sheet size: 174\*94\*5 mm  
P.f. 67/68°C  
CE: NO
